The Aramex difference

We understand that a courier service isn't just about parcel delivery. We offer solutions for your business. As your Courier partner, Aramex franchisees provide local, national and international delivery options. Value added services can be tailored to your needs. This pricing guide outlines our rates and services and if there is anything we haven't covered, please contact us for more information.

How to price and send your parcel

- Step 1 Weigh your parcel
- Step 2 Log in to [aramexConnect.com.au](https://aramexconnect.com.au)
- Step 3 Calculate shipping price for destination
- Step 4 Select from the value added services below if applicable
- Step 5 Label parcel and arrange collection

Weigh your parcel (consider the cubic weight)

You'll need to know your parcel's actual weight and its cubic weight, as the delivery rate is calculated on whichever is greater.

The cubic conversion rate is 250kg per cubic metre.

$$H(m) \times W(m) \times L(m) \times 250$$

1. Convert measurements to metres. For example, 30 centimetres is .3 metre, 5 centimetres is .05 metre
2. Multiply the height x width x length x cubic conversion (250) to get the cubic weight.
Example: (H) 0.8m x (W) 0.5m x (L) 0.15m x 250 = 15kg
3. So, if the actual weight of this parcel was 5kg and the cubic weight was 15kg, the greater weight of 15kg is used to calculate the label price.

Please note: For domestic deliveries, the maximum parcel length is 2m and no more than one dimension (length, width, or height) can exceed 1.05m.
